

Usability: Can I stream audio / video in Vesica?

Yes, you can stream your audio and video files in Vesica.

Note that Vesica uses HTML5 to stream audio to allow for compatibility with both desktop and mobile devices.

Currently, the following compatibility issues are known with HTML5 audio / video streaming and Vesica:

- Mozilla FireFox versions before 4.0 will not stream video or audio properly
- Internet Explorer 8 does not stream audio / video. You must have Internet Explorer 9

As a general rule, the following browsers are supported:

- Microsoft Internet Explorer 9 +
- Mozilla Firefox 4 +
- Generally available versions of Google Chrome and Apple Safari
- Opera version 11+

Unique solution ID: #1039
